

Stave Telescope Design

Stave Ends

Slot and Hole for 2mm Ball

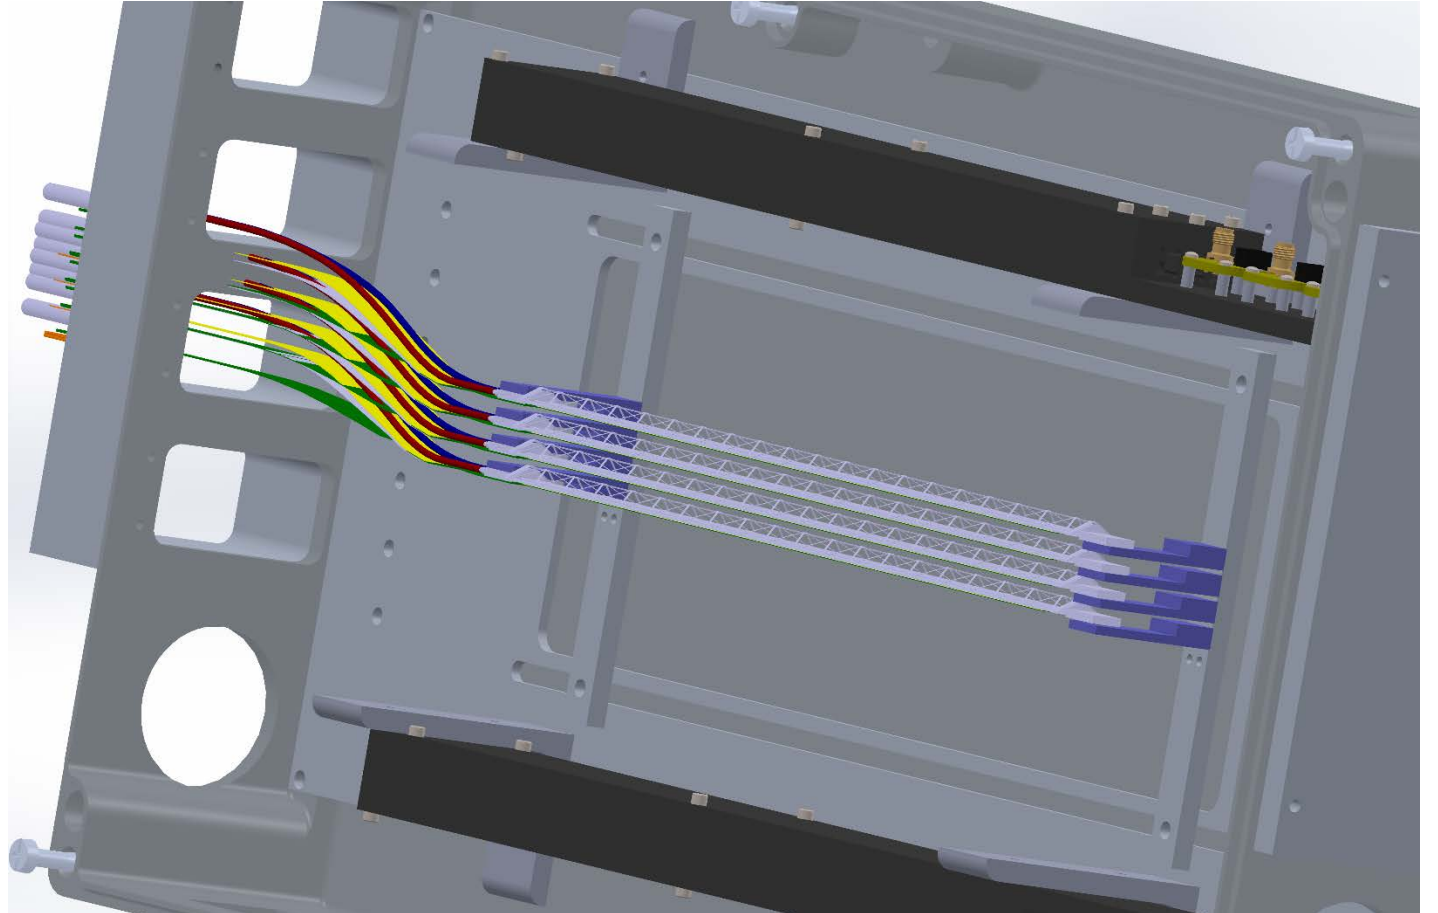

Mount Features

Ladder Construction

- Same PEEK mounting piece for both sides
- Mount PEEK to staves individually then assemble ladder
- Ladder mates to same features as single board telescope
- Added brackets to support the triggers inside the box
- If this is acceptable, I will generate prints for the shops and discuss with UT-Austin

Negative Pressure Heat Exchanger

- Next step is to modify HX internals to drop the pressure and test with no load
- Melynda has requested I talk with a PSO, I'll chat with Bob King
